E-course Health and Safety Training for Students

The "Health and Safety e-course" will be available to all faculties from **February 24, 2025**, to **March 23, 2025**.

According to <u>Regulation No. 22/2024 of the Rector of the Warsaw University of Technology of April 22, 2024</u>, all students starting their first year of first-cycle, second-cycle and long-cycle Master's degree programmes are required to complete an initial training on healthy and safe learning conditions.

The initial training on healthy and safe learning conditions is conducted online on the Leon Platform of the Warsaw University of Technology. Each course participant must log in to <u>the LeOn PW platform</u> on their own during the above-mentioned period and complete the "Health and Safety e-course." The training consists of informational materials and a mandatory test.

Registration Methods:

- Students of first-cycle, second-cycle and long-cycle Master's degree programmes are **automatically** enrolled in the Health and Safety e-course through the USOS system.
- Students who fail to complete the Health and Safety e-course within the specified time limit during the semester are required to contact with the Dean's Office of your Faculty.

Instructions on logging into the Leon platform:

1. Go to the platform's homepage.
2. Select "Log in" (in the upper right corner of the screen) and then click "Log in to the platform."
3. The login and password are the same as for the USOSWeb system.
4. Enter your login: PESEL number or the email address provided during registration (or the ID number obtained from the dean's office of the relevant faculty in case you do not have a PESEL number).
5. Enter your USOSWeb password. Students logging into USOSWeb for the first time should use the password from the PW Admissions system.
6. Select the course: "Health and Safety Training":
   Health and Safety Training 1834-00000-00A-0001

Important!

If you do not remember your password, try to recover it yourself by following the recovery procedure available at (<u>password reset link</u>). If there is insufficient data in the system or if you are unable to recover the password on your own, you should contact the dean's office of your faculty.
